For
Cold Chain Management

Executive Programme in Cold Chain Management (EPCCM)

WHAT IS COLD CHAIN MANAGEMENT?

Cold Chain Management refers to the process of maintaining a temperature-controlled supply chain to preserve and ensure the quality, efficacy and safety of products that are sensitive to temperature variations. The cold chain encompasses the entire journey of temperature-sensitive products, from production through transportation and storage to end-user delivery. This includes not just the physical infrastructure but also the practices and protocols required to monitor and control the temperature conditions throughout the chain.

BENEFITS

- 3 MONTHS TENURE
- CARRIER OPPORTUNITIES
- 3-5 LAKH STARTING SALARY
- INDUSTRY ENABLED PROGRAM
- ONE INDUSTRIAL TRAINING

100%
JOB
ASSISTANCE

Eligibility & Objective

- Graduate/Postgraduate in Science, Arts, Pharmacy, Medicine, Nursing, Allied Science and Management studies.

Course Fee: Rs. 25000 + G.S.T
